

Considerations

CaaS

Premise

We don't have the budget to spend much up-front on software or a robust infrastructure to meet our reliability and DR requirements

Our IT staff requires full administrative access and control

We need to be up quickly but don't have the IT staff to do so, nor do we have the resources to properly maintain the system

Our environment requires a high degree of custom development

Management has mandated we reduce capital spending and move to an outsourced technology model unless there is good reason not to

We prefer purchasing the software and hardware we use outright

We'd like the flexibility to pay as we use the software, able to rapidly scale up or down based on seasonal demand

Corporate policy forbids hosting mission critical applications

We need to free-up IT resources for more strategic initiatives and get back to our core business

The business requires capabilities not currently offered via CaaS
