Interaction Center Certified Engineer (ICCE) Training Part 1

Course Overview

Course Duration: 5 days (8:30am – 5:00pm)

This is the first course in the series to obtain the Interaction Center Certified Engineer (ICCE) certification. Upon successful completion of this course, and the **Interaction Center Certified Engineer (ICCE) Bootcamp – Part 2** class, students will achieve the ICCE certification.

This course in the series provides the student with the knowledge and skills necessary to implement and support the Interaction Center Platform®. The student will learn the architecture of Customer Interaction Center™ (CIC) and apply that knowledge to the implementation of an Interaction Center Platform system. Students will learn basic server installation and perform administrative tasks through a combination of instructor-led lectures, hands-on labs and interactive labs.

- **This is a technical class with exposure to Microsoft Windows 2008 and various networking concepts, therefore, all students must have prerequisite knowledge/experience in the areas outlined in the *Course Prerequisites* section of this document.**
- **Students will be required to demonstrate successful completion of course objectives by passing a written and a practical examination.** *Students who fail who miss a significant portion of the class, or who do not obtain a passing score on the exams will not be promoted to the next level in the class.*

Intended Students

This is a technical class, and is recommended for those person(s) in the role of:

- **Customer Interaction Center Implementer:** Performs implementation and support of the system, troubleshooting installation and initial configuration.

Course Objectives

This course will prepare the students to perform the following tasks:

- Describe Pre-Installation tasks
- Apply licenses
- Install and configure Interaction Center components
- Configure and provision a managed phone
- Perform basic functionality tests on a CIC server
- Configure CIC security
- Perform basic CIC administrative tasks including:
 - Configuring lines
 - Performing system configuration in Interaction Administrator®
 - Performing user, workgroup & roles configuration in Interaction Administrator
- Customize Inbound call flows using Interaction Attendant®
